

PLANT RETAIL DISPLAY

TIERED SHELF UNITS

Innovative Plant Merchandising Equipment

Key Features

- ✓ Bottom Up Water (With Taps)
- ✓ Low Foot Print
- ✓ Lockable Wheels
- ✓ Tilting Tray (3 Positions)
- ✓ Block Colour for Maximum Impact

3 & 4 Tiered Display Units

These units are available with 3 and 4 shelves that sit vertically above each other to maintain a narrow 650mm x 2170mm foot print while offering maximum merchandising capacity. The overall height of the frame is 1650mm and the trays are 2070mm x 570mm

The 3 tray unit is suitable for taller and potted plants and the 4 tray unit is best for seedlings and smaller plants.

The trays can be easily individually tilted to to 20 or 30 degrees or positioned flat for impact display.

Like all Woodham merchandising units these units have plastic trays that enable bottom up watering when tilted to the flat position.

100mm castor wheels (front wheels are braked to prevent roll) and this enables the units to be easily moved to provide for flexibility and in particular makes them ideal for front of store display and merchandising.
